WHEELS

WHEEL COLLECTION  **VOL 14**

kingwheels.com.au   

Established in 2004, King Wheels is an Australian owned and operated wholesale and distribution company - producing high quality alloy and steel wheels engineered and designed with superior strength and durability.

Many of our alloy wheels are manufactured with Rotary Flow Forging technology, a process which compresses the wheel's outer band to provide a stronger and lighter product.

Look for the GVM + logo to view products tested at higher load ratings surpassing Australian and International standards for GVM upgraded vehicles.

With Australia's widest variety of powder coated steel wheel fitments and styles, King steel wheels are the number one choice for any serious off-roader. Covered by a Lifetime Structural Warranty and years of research and development in Australia's toughest conditions, you can rest assured when purchasing King Wheels you've made the right choice!

Lifetime Structural Warranty

Terms & Conditions

All alloy and steel wheels distributed by King Wheels Australia Pty Ltd are covered by a Lifetime structural warranty to the original purchaser.

All alloy and steel wheels have a one year warranty on all finishes to the original purchaser from the date of purchase invoice.

A copy of the original purchase invoice must be supplied with all wheels returned for warranty inspection. Any wheel which does not qualify for warranty will be returned.

Freight returns and re-shipping will be at the customer's expense unless authorised by King Wheels Australia Pty Ltd.

King Wheels Australia Pty Ltd will not be liable for costs incurred regarding a warrantable product.

All King Wheels products will not be warrantable if used in off-road or motor sport applications.

Warranty will be void if any repairs or modifications are made to the original King Wheels product or resulting from accident damage, negligence or misuse.

Warranty on wheel finish will be deemed void if chemicals, abrasive cleaning products or high pressure water cleaners are used in the maintenance of the wheel due to adverse weather conditions, salt water, road chemicals or brake dust corrosion.

Warranty on decorative bolts and accessories will be deemed void if the original finish has been stripped or removed by the use of chemical cleaners, caused by pneumatic/battery tools or high pressure cleaners.

Wheels installed with incorrect tyre size, load rating or used with excessive vehicle loads will be deemed void of warranty.

Check legal fitments with all relevant state authorities before installing on any motor vehicle.

* Photos are for illustration purposes only.
Nuts, caps and decals are subject to change.

The KING OFFROAD 'SNATCH' is new to the market and features an aggressive concave spoke + a competition inspired imitation dual Beadlock. Rolling in 3 finishes including 'Light Gun Metal - Machined' or 'Satin Black - Bronze Tint' complemented by zinc bolts + the traditional 'Satin Black' featuring stainless steel bolts. The KING debossed spoke logo and heavy duty 1600kg load rating is fast becoming a KING OFFROAD trademark making the 'SNATCH' the perfect choice for the wheel enthusiast.

FLOW FORGED WHEELS

The Rotary Flow Forged Technology compresses the density of the aluminum molecular structure which allows for a significant increase in the structural strength of the wheel and a decrease in the overall weight of the wheel. The Flow Forging process results in a wheel that will provide a lower unsprung weight, improved performance and greater durability.

CBL Technology

King centre bore locating rings perfectly fit between the wheel and vehicles hub making it easier to properly install the wheel and tyre combination. When a wheel is mounted correctly it reduces vibration and helps prevent taper elongation.

* Nuts and caps are optional extras on all steel wheels.

With Engineering + Innovation & Technology at the forefront since the inception, King Wheels in 2008 set out to create an industry first. A product that could load up to 2100kgs per wheel and pass our rigorous corner fatigue + impact and radial testing to meet the harsh conditions of the Australian Mining Sector, predominantly based around Toyota's LC79.

King Wheels has recently expanded the fitment list, product finishes and industry application - making it the perfect fit for high load rated trailers, caravans and campers + an ever-growing 4x4 industry. There are 2 load options now available at 1800KG / 2100KG.

Powder coated in either Satin Black or the traditional Gloss White with a yellow pinstripe, the mining wheel has been used by Government, Mining and Emergency Services.

The circular cutouts, raised nut holes and pad area help for added strength coupled with either 8mm or 10mm disc centres that are fully welded in place. Partner your wheel purchase with the Mining Nut specifically designed to fit an O.E wheel brace and features a deeper taper + 22mm hex head.

Find your closest wheel retailer on our website at kingwheels.com.au to find out more about King Mining products.
